PROJECTS

Mini React App

React, JavaScript, Redux

Allows users to filter and view posts from existing subreddits. Utilizes function components and react router for rendering and page navigation as well as redux to manage post state, search and filter functionality.

GitHub OAuth

EJS, Express.js, Passport.js

Login application utilizing Github passport strategy and express session. The app makes backend calls to an express server and uses ejs views to render pages.

Golf Scores PERN App

React, Express.js, Postgres, Auth0

React app using express api and postgres to allow users to login via auth0 and upload their latest golf scores.

Ecommerce Plant Store

React, AWS, Lambda, DynamoDB, Amplify

Configured static HTML site into a dynamic webpage utilizing React and backend AWS services.
